the complete photo guide pdf

That's it. The camera (and the telephoto lens) does the rest—you get a sharp photo of the tiger and the background is totally out of focus. So, you just learned one of the three aperture tricks: low numbers (and a zoom lens) leave your subject in the foreground in focus, while the background goes out of focus.

The picture can then be edited in your photo editor to get the look that you want, rather than having to adjust from the settings made to a jpeg image. In the picture below, the top photo was taken in auto jpeg mode and the bottom picture was taken as a raw format. The top has better lighting but less detail.
