Radioactive Decay Note to students and other readers: This Chapter is intended to supplement Chapter 6 of Krane's excellent book, "Introductory Nuclear Physics". Kindly read the relevant sections in Krane's book first. This reading is supplementary to that, and the subsection ordering will mirror that of Krane's, at least until further notice.

Graph exponential growth and decay functions. Use exponential models to solve real-life problems. Exponential Growth and Decay Functions An exponential function has the form  $y = abx$ , where  $a \neq 0$  and the base  $b$  is a positive real number other than 1. If  $a > 0$  and  $b > 1$ , then  $y = abx$  is an exponential growth function, and  $b$  is called the ...

decay showing itself as an exponential process, as shown in Fig. 3-2. The number,  $N$ , of the original nuclei remaining after a time  $t$  from an original sample of  $N_0$  nuclei is  $N = N_0 e^{-(t/T)}$  where  $T$  is the mean lifetime of the parent nuclei. From this relation, it can be shown that  $t_{1/2} = 0.693T$ .

wood decay, degradation and stain. A common cause for replacing wood structures is decay or degradation. Wood decay and most insect problems can be prevented for years by properly using and protecting wood. The heartwood of some species, such as black locust and Osage orange, also has a unique chemical composition that makes it very durable.
