Relationship to Other Benefits and Costs. In all of the above examples, the benefits flow to parties that depend on transportation facilities and services for their activities. In some cases, the ultimate beneficiary is the business operation that can achieve operating cost savings or greater productivity (output per unit of cost).

Economic growth is the increase in the inflation-adjusted market value of the goods and services produced by an economy over time. It is conventionally measured as the percent rate of increase in real gross domestic product, or real GDP.. Growth is usually calculated in real terms - i.e., inflation-adjusted terms " to eliminate the distorting effect of inflation on the price of goods produced.
