Ecological economics (also called eco-economics, ecolonomy or bioeconomics of Georgescu-Roegen) is both a transdisciplinary and an interdisciplinary field of academic research addressing the interdependence and coevolution of human economies and natural ecosystems, both intertemporally and spatially. By treating the economy as a subsystem of Earth's larger ecosystem, and by emphasizing the ...

Abstract. In The Economics of Biophilia, we share several examples of small investments involving very low or no up-front cost, such as providing employees access to plants, natural views, daylight, and other biophilic design elements. These measures provide very healthy returns. Integrating views to nature into an office space can save over \$2,000 per employee per year in office costs, whereas ...
