Traffic lights, also known as traffic signals, traffic lamps, traffic semaphore, signal lights, stop lights, robots (in
South Africa and most of Africa), and traffic control signals (in technical parlance), are signalling devices

positioned at road intersections, pedestrian crossings, and other locations to control flows of traffic.. The world's first traffic light was short lived.

A light-emitting diode (LED) is a semiconductor light source that emits light when current flows through it. When a current passes through the diode, which is formed of two different semiconductor materials, electrons are able to recombine with electron holes, releasing energy in the form of photons. This effect is called electroluminescence. The color of the light (corresponding to the energy ...
